(54) **Lamp unit and optical analyzer using the same.**

(57) A lamp unit is provided with a projecting portion (128) on the inner wall of a lamphouse (118) in the vicinity of the arc portion (120) of a lamp (110). The lamphouse is ventilated by a fan (122) provided at one end of the lamphouse and a vent (126) provided at the other end. The inner diameter of the lamphouse at the arc portion provided with the projecting portion is smaller than that of the end portions, so that the flow velocity of the air passing through the lamphouse is higher in the vicinity of the arc portion. Even if the lamp (110) is horizontally installed, which lowers the heat dissipation efficiency, since the lamp (110) is adequately air-cooled, an extreme temperature rise is prevented.

Furthermore a magnet is provided in the vicinity of the lamp to stabilize the arc of the horizontal arc lamp. As a bulb material for the lamp, quartz glass having a low transmission below 220nm is used. A cartridge (of e.g. ceramic) permits easy replacement of the lamp unit.

CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing more than ten claims.

- ☐ All claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims and for those claims for which claims fees have been paid, namely claims:
- ☐ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for the first ten claims.

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

See sheet -B-

- ☒ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.
- ☐ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:
- ☐ None of the further search fees has been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirement of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims 1-6 : Cooling mechanism for a (short art type) lamp.
2. Claims 7-9 : Lamp replacing mechanism for a lamp in an optical analyzer
